

POWERBAND RFX75

**75 – 100 Watt Original Equipment Final Amplifier Section
with High Performance Low Pass Filter for Magnum Transceivers**

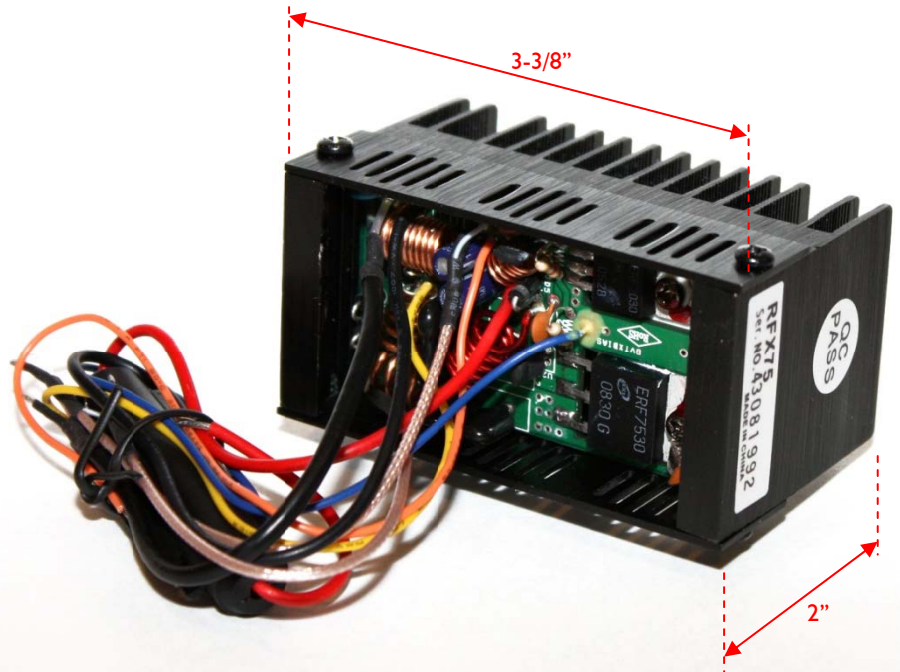

The RFX75 is a replacement part for Magnum 10 meter amateur transceivers. The RFX75 includes the RF driver and final output stages and low pass filter section from a Magnum 10 meter amateur transceiver.

The RFX75 does not work independently, but it is an integral part from a Magnum transceiver and is available for repair and replacement purposes.

The RFX75 features the latest Power MOSFET technology and has a built in S-meter detection circuit. The RFX75 uses the new ERF7530 75W RF Power MOSFET from EKL Components – original equipment supplier to Magnum.

SPECIFICATIONS

Final Transistor: ERF7530 (x1)
Driver Transistor: ERF2030 (x1)
Low Pass Filter: 3 Stage
Dimensions: 3-3/8" x 1-5/8" x 2"

The RFX75 is distributed by...
